OFFICE ADMINISTRATOR

Concrete Reinforcement Services Ltd. - Sydney, Australia
February 2016 - June 2017

Performed office administrative tasks in the small office of a construction company reporting directly to the owner. The role involved dealing with payroll, financial and bookkeeping routines.

- Responsible for liaising with the third-party tech company which administered the firm's website to request content updates and minor design changes

- Successfully built spreadsheets in order to perform calculations using advanced functions and formulas, used different formatting techniques, and created different types of graphs using MS Excel

- Analyzed business transactions in Xero Accounting Software in order to journalize and post data to correct accounts in company's General Ledger to maintain up-to-date financial records

ACCOUNTING ANALYST

Baush & Lomb Ltd. - Porto Alegre, Brazil
January 2011 - August 2012

Worked with a team of 5 accountants in the accounting department of a multinational company performing a variety of accounting task such as reconciliations, preparation of journal entries and month-end closing activities using the company's ERP system.

- Analyzed the company's expenses monthly for each department, comparing actual figures with the budget and provided explanations about the discrepancies for the CFO

- Participated on the process of training and evaluating the learning progress of the accounting intern

TAX ASSISTANT

Baush & Lomb Ltd. - Porto Alegre, Brazil
October 2008 - December 2010

Worked in the tax department of a multinational company recording invoices and constantly monitoring the changes on taxation law to ensure that processes and system parameters complied with government requirements.

- Calculated the difference in Tax collected from company sales and Tax paid for company purchases in order to submit the correct amount of tax payable to the taxation office

- Successfully implemented the international trade module on the ERP system - working with the IT and International Commerce departments - which reduced the overall import processing time and input errors and eliminated redundant work.
